

How to Get Verified on the website

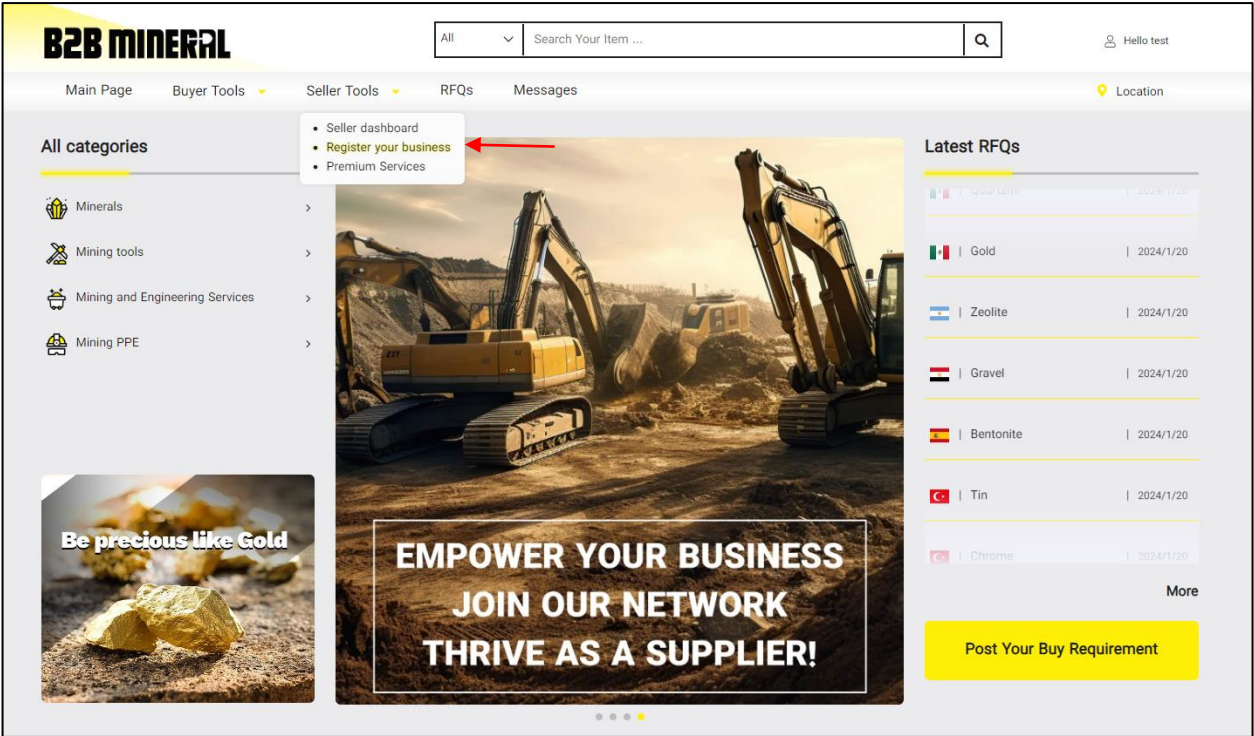

To have your own business page and list your products or services, you need to get verified. Buyers can also get a verified buyer badge by completing their information.

Here's how to start the verification process:

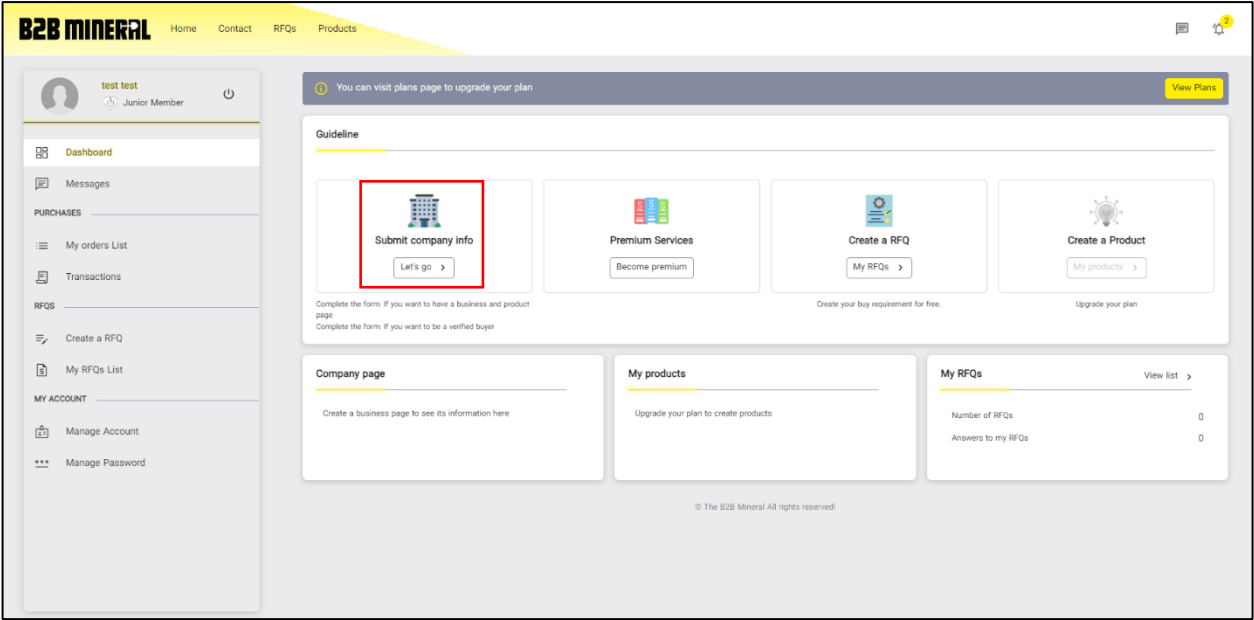

1- From the Top Menu and the Buyer Tools Section:

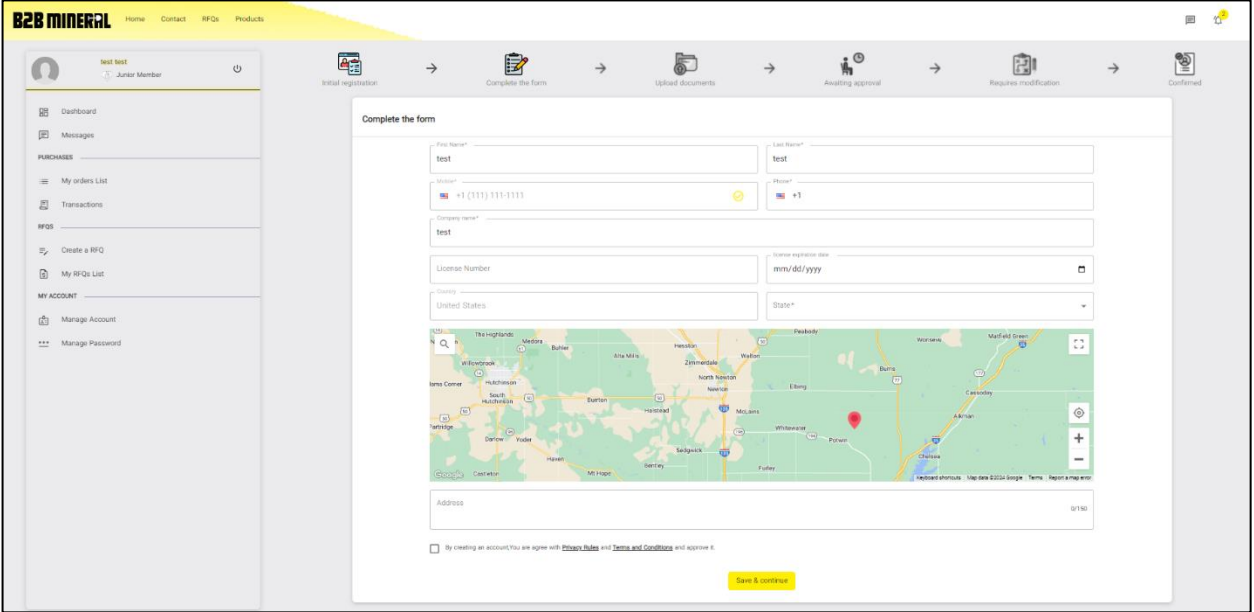

2- From the Seller Tools section in the top menu:

3- From your account dashboard by clicking "Submit Company Info":

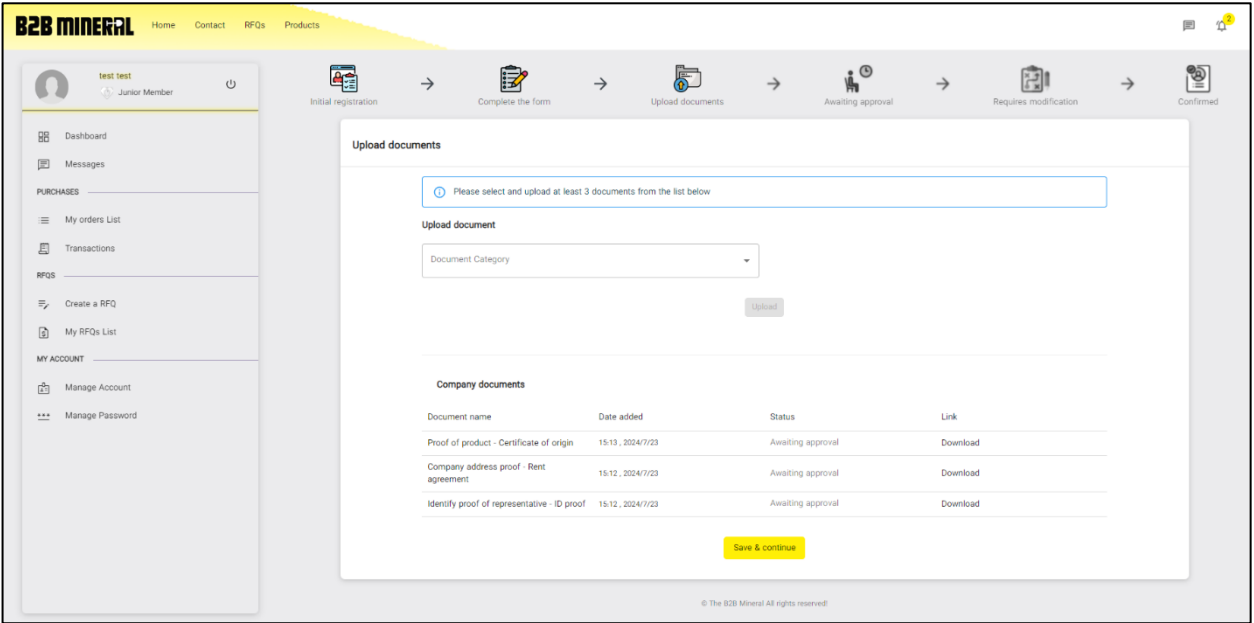

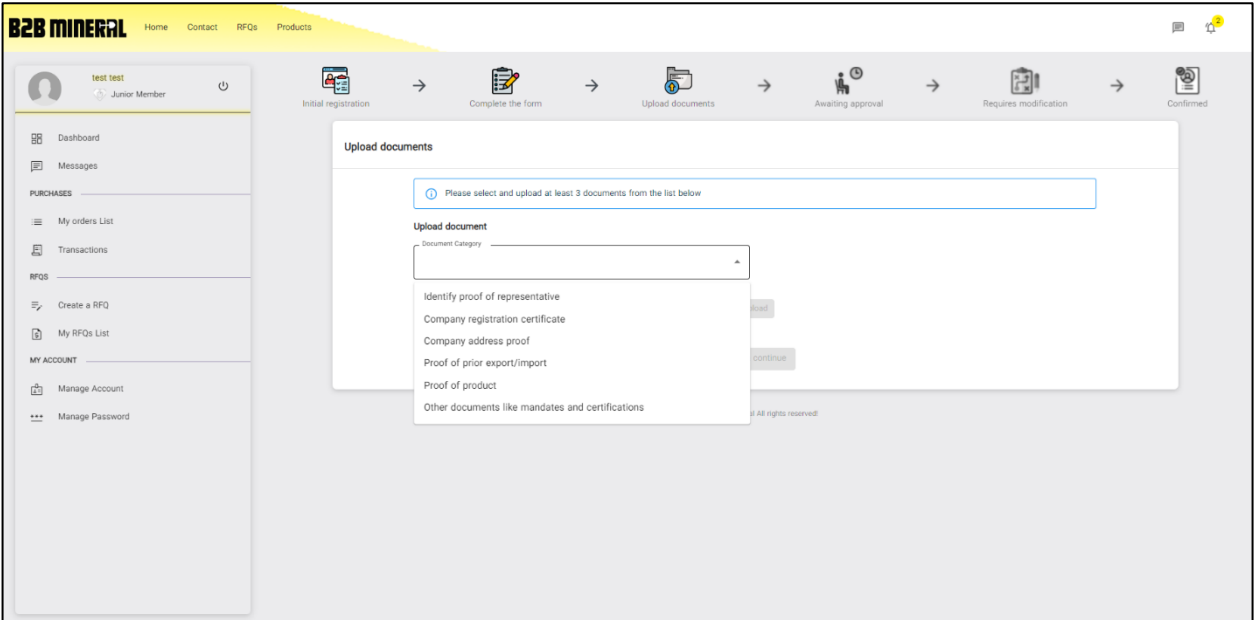

These options lead to this page:

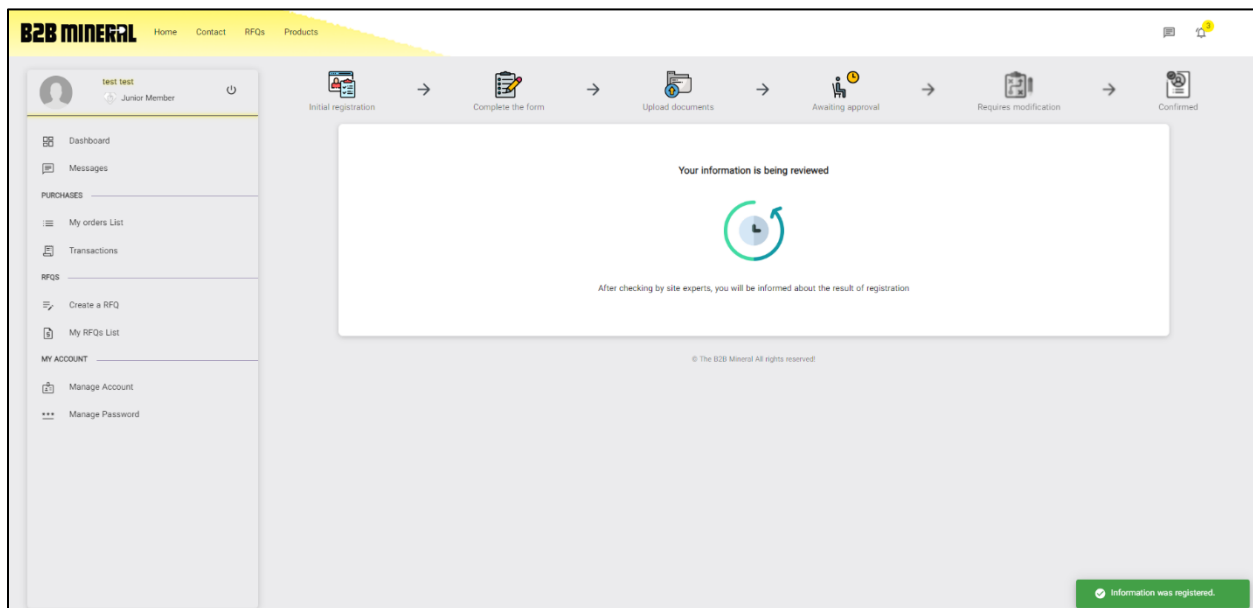

Complete the requested information, specify your company address and location, and proceed to the next page.

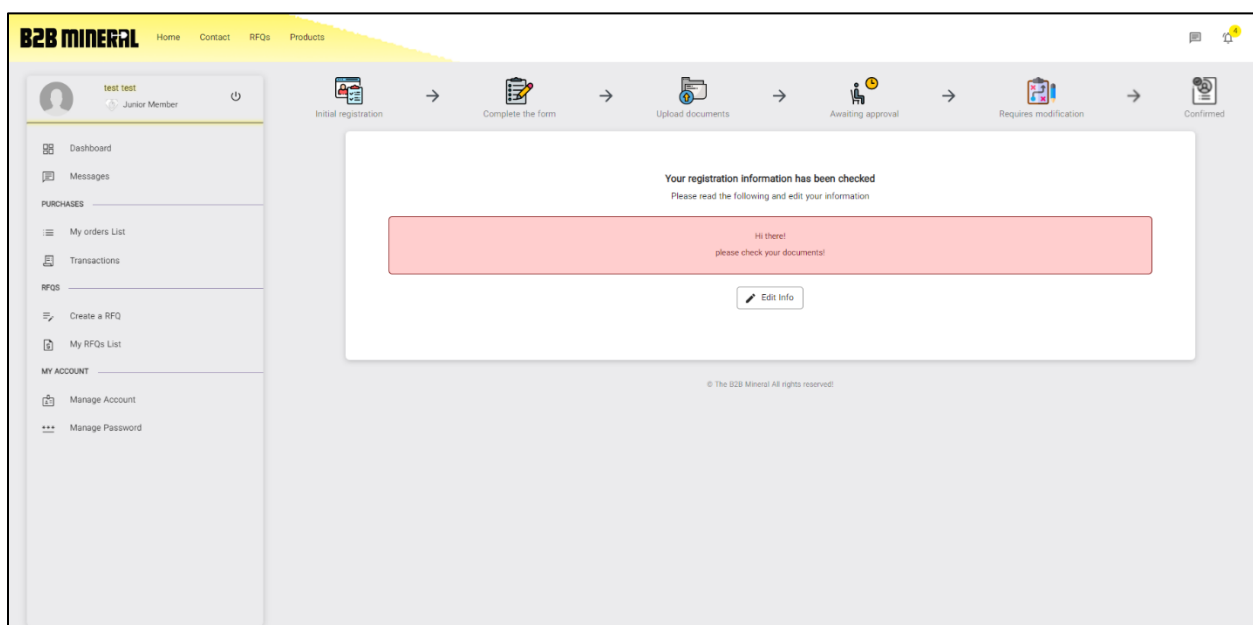

Here, you must upload at least three documents from the provided list.

After uploading your documents, you'll see this window. Our team will review your information and documents.

If there are any issues with your documents, you'll receive a message detailing the problem and how to fix it. After the issues are solved, your documents will be reviewed again.

Once your documents are approved, you'll see this confirmation page, indicating that your verification is complete.
